

PALMDALE WATER DISTRICT
A CENTURY OF SERVICE

Water-wise Sprinkler Upgrade Rebate Program

Rebate Offer:

Under the Water-wise Sprinkler Upgrade Rebate Program, a Palmdale Water District (PWD) customer may receive a \$4.00 account credit for every sprinkler retrofitted with an HE/MP Rotator nozzle. Rebate credits are applied to the customer's water service account of record in PWD's service area.

Purpose:

- Traditional sprinklers lose a significant amount of water due to wind and evaporation.
- HE/MP Rotator nozzles are designed to produce less mist and less runoff.
- The slower application rate allows water to gently soak in, reducing wasteful runoff.
- HE/MP Rotators provide increased flexibility of various arch and radius settings.
- Replacing your traditional sprinklers with HE/MP Rotators could use up to 30 % less water when you irrigate your property.
- This upgrade will improve irrigation efficiency, save water, and reduce your water bill.

Program Restrictions:

- Applicant must have a PWD water service account in good standing.
- Credits are for retrofits of existing sprinklers only; new construction does not qualify.
- Funding is based on a first-come, first-served basis until funds are depleted.
- Any rebates are subject to state and/or federal reporting and IRS guidelines. Recipients will be solely responsible for any taxes or reporting requirements.
- Applicants must sign that they have read, understand, and agree to program requirements.

Project Requirements:

- All purchased and installed HE/MP Rotator nozzles must be on the SoCal Water Smart Qualifying Products list at www.socalwatersmart.com
- All sprinklers on same irrigated zone controlled by a specific station must be retrofitted.
- Installation of nozzles and original receipt required within 90 days of purchase along with application.
- Applicant shall permit PWD access to the project site to complete a post-inspection.
