

**PALMDALE WATER DISTRICT**  
A CENTURY OF SERVICE

## Residential Water Survey

A free Residential Water Survey Program is available to property owners and tenants within Palmdale Water District (PWD) service boundaries. To schedule a survey, please call 661-456-1001 and provide your name, address and phone number. A PWD Water Use Efficiency (WUE) representative will follow up with you to schedule an onsite visit. It is important for the tenant/occupant to be present during the survey as it also serves as an education program.

During the survey, a WUE representative will tour the property to identify leaks and water saving opportunities as well as evaluate the landscape and irrigation system controller.

### Interior Survey:

- Check shower heads and faucets for leaks
- Check for leaks in toilets and water heater
- Provide low-flow shower heads, if needed

### Exterior Survey:

- Review irrigation system
- Review irrigation schedule
- Identify irrigation problems
- Provide a hose nozzle, if needed

During the appointment, the WUE representative will teach you how to read the water meter, show you how to determine if there is a leak on your property, and inform you of any rebates or programs that may be available to you.

A summary report will be provided to the owner/tenant at the end of the survey.
