FOR IMMEDIATE RELEASE

PWD VIRTUAL COFFEE EVENT ON MAY 25 TO FEATURE BOARD PRESIDENT DIZMANG

Palmdale, CA – Taking the seat at this month’s Virtual Coffee with a Director event on Facebook Live will be Palmdale Water District (PWD) Board President Gloria Dizmang. The event will be on PWD’s Facebook page, @palmdaleh2o, from 9-9:30 a.m. on Tuesday, May 25.

The community is invited to join the livestream to ask water-related questions and get acquainted with President Dizmang, who represents PWD’s Division 3. Written questions can be submitted as Facebook messages before or during the virtual event.

“I am excited to meet the constituents virtually and share my thoughts and concerns about the dry conditions we are experiencing,” she said. “I am going to provide some water-saving tips and, hopefully, help customers save water and save money. It is important that we all do our part for the future of water.”

(more)

During the event, attendees also will learn about President Dizmang's background, interest in water and goals for PWD.

An Antelope Valley resident since 1965, President Dizmang spent her entire career in education. She was an educator and administrator for the Antelope Valley Union High School District for 36 years and later was an Antelope Valley College adjunct professor. She has served as a rent negotiator for the city of Palmdale and as president of the Palmdale Civic Authority. After one term on the PWD Board of Directors during 2011-15, she was appointed by the Board in April 2019 to fill a vacant seat in Division 3 and ran unopposed in 2020.

Division 3 roughly lies between Avenue S to the north, Pearblossom Highway to the south, 70th Street to the east and 25th Street to the west.

Since 1918, the Palmdale Water District has provided high-quality water at a reasonable cost. We pride ourselves on providing great customer care; advocating for local water issues that help our residents; educating the community on water-use efficiency; and leading our region in researching and implementing emerging technologies that increase operational efficiency.
